- Airflow
- JMeter
- HTML5
- CSS3
- Javascript
- React JS
- Ruby
- Rails
- MySQL
- PostgreSQL

PROJECTS

TXC Clan Crypto - https://github.com/KeithWesley254/crypto-Tracker-Wes

Technologies - React JS | Material UI | Rails.

Project Description - TXC Clan Crypto is an application inspired by the rise of cryptocurrencies. The application aims to give relevant up-to-date information on everything related to cryptocurrencies. More features will be implemented in the future such as information on different owners and other investment areas.

TXC FortBase - https://github.com/KeithWesley254/txc-fort-base-react-rails

Technologies - React JS | Material UI | Rails.

Project Description - TXC FortBase is a fandom page for people who want to connect with the nation's heroes. You can get information about the latest technologies in the TXC military and public research.

TXC Gaming News - https://github.com/KeithWesley254/gaming-news

Technologies - React JS | Material UI.

Project Description - A website dedicated to everything gaming. Offers game giveaways, MMO news, and updates and recommends free games. The website consumes multiple external APIs including the Marvel API.

Events Bomboclat - https://github.com/KeithWesley254/bomboclat-events-frontend

Technologies - React JS | Material UI | Rails.

Project Description - A web application built to let entrepreneurs create events and users, register for events.
